

**Give It Up**  
Eli Conley

Leave a note, make the call, walk on over, don't stall  
Say it's over, that's all, give it up  
Dear you said it your yourself, he is hurting your health  
All of us want to help, give it up

When you leave you'll be lonely  
But that is the only  
Way out of this mess that you're in  
You're not bad, you're not good  
You have chopped all the wood  
But your fire will not be rebuilt

When it's done, you must leave, try your best not to weep  
Till you're home in a heap, give it up

When you leave you'll be lonely  
But that is the only  
Way out of this mess that you're in  
You're not bad, you're not good  
You have chopped all the wood  
But your fire will not be rebuilt

Take a break, take a pill, take a bath if you will  
There are times when you must give it up
